

Izyan Tanveer

EDUCATION

Mountain House High School

Computer Science Pathway | Second Year

Mountain House, CA

Expected May 2028

- **Courses:** CSE, AP CSP, AP Cybersecurity
- **Related Clubs:** Hackathon, Robotics,

EXPERIENCE

ThinkNeuro

Remote

Software Engineering Intern

Jan. 2026 - Mar. 2026

- Evaluated complex real-world datasets using Python (Pandas, NumPy, SQL) to extract actionable insights, supporting a team-built solution aimed at optimizing system performance and data-driven decision-making
- Implemented Git for robust version control, actively participating in branching strategies, pull requests, and code reviews to maintain code quality and ensure seamless team integration in a production environment

VEX V5 Robotics

Mountain House, CA

Programmer/Builder

Sept. 2024 - present

- Designed, built, and programmed a VEX V5 competition robot using C++, contributing to autonomous and driver-control functionality that improved match performance by **90%**
- Collaborated with a team of **7** students to iterate mechanical designs, troubleshoot hardware/software issues, and apply engineering design process principles under competition deadlines
- Analyzed game strategy and optimized robot subsystems (drive, intake, lift, etc.) to increase scoring efficiency, helping the team advance to state competitions.

PROJECTS

To-Do List Web App

HTML, CSS, JavaScript

- Built a responsive to-do list web app allowing users to add, delete, and mark tasks as complete
- Used JavaScript DOM manipulation and localStorage to persist tasks across sessions
- Designed a clean UI with CSS and implemented input validation for improved usability

Password Generator

JavaScript, HTML, CSS

- Developed a customizable password generator that creates secure passwords based on selected length and character types
- Implemented randomization logic using JavaScript to include uppercase, lowercase, numeric, and special characters
- Added input validation and copy-to-clipboard functionality to improve usability

Counter App

HTML, CSS, JavaScript

- Built a simple counter application with increment, decrement, and reset functionality
- Used JavaScript event listeners to update values dynamically in the DOM
- Implemented basic state management using variables to track count changes
- Designed a responsive and minimal user interface with CSS

SKILLS AND TECHNICAL TOOLS

Languages: Python, JavaScript, HTML

Tools: GitHub, Unity
